FUND OVERVIEW

This fund invests in the shares of UK companies and aims to achieve a return that is consistent with the return of the FTSE All-Share Index.

**CAPITAL AT RISK:** The value of investments and the income from them can fall as well as rise and are not guaranteed. Investors may not get back the amount originally invested.

KEY RISKS:

- Investment risk is concentrated in specific sectors, countries, currencies or companies. This means the Fund is more sensitive to any localised economic, market, political, sustainability-related or regulatory events.
- The value of equities and equity-related securities can be affected by daily stock market movements. Other influential factors include political, economic news, company earnings and significant corporate events.
- While the Fund, in accordance with its investment objectives, seek to track the performance of their respective Benchmark Index, whether through a replication or optimising strategy, there is no guarantee that it will achieve perfect tracking and the Fund may potentially be subject to tracking error risk, which is the risk that their returns may not track exactly those of their respective Benchmark Index, from time to time.
- Counterparty Risk: The insolvency of any institutions providing services such as safekeeping of assets or acting as counterparty to derivatives or other instruments, may expose the Fund to financial loss.

#### SECURITIES LENDING

In principle, all funds may participate in securities lending. BlackRock, acting as an agent, currently lends securities on behalf of certain funds with the objective of generating incremental returns for the funds while maintaining a low level of risk.

Should a particular fund undertake securities lending, it will receive 62.5% of the income generated by this activity and the remaining 37.5% will be received by BlackRock as the securities lending agent. The fact that BlackRock receives a portion of the fee generated from the overall securities lending income does not increase the costs of running the fund. Securities lending involves risk such as that of counterparty default. As an additional safeguard in the event of a counterparty default, BlackRock, Inc. provides the fund with an indemnity to cover losses associated with borrower default — in the event of a default, if a shortfall exists between the proceeds of the sale of the collateral and the cost to repurchase loaned securities, BlackRock reimburses the fund in full under the terms of the indemnity.
